University of Washington, Seattle, WA
09/2014 – 06/2018 (Expected)

- Dean's Honor Listed & Received the Student Employee Award
- *Related Courses:* Web Design & Dev., iOS Mobile App Dev., Data Structures & Algorithms, Design Thinking

EXPERIENCE

Web Developer Intern

Ogilvy One Worldwide | Bangkok, Thailand | 07/2017 - 09/2017

- Worked with clients such as Samsung and Nivea in developing modern and attractive websites, while providing 24/7 support and services after launch
- Improved speed and performance of existing websites by utilizing new RESTful services, API calls, and re-writing JavaScript codes from scratch
- Designed email templates for Samsung in Adobe Photoshop and developed them via Foundation for Email framework
- Wrote five functional specific documents (FSD) and updated existing ones to keep up with a website's current features

Android Application Developer Intern

Bitsee (Startup) | Seattle, Washington USA | 01/2017 - 03/2017

- Designed and developed a single-page website to promote the app (bitsee.ai). The site was built using HTML5 Boilerplate, Bootstrap, and CSS3 functionalities (like Flexbox)
- Developed interactive welcome screen and a tutorial section that guides first-time users to feel more familiar with the app
- Updated existing test scripts to reduce bugs and provide stability

Android Application / Web Developer Intern

CP All | Bangkok, Thailand | 07/2016 - 09/2016

- Wrote PHP scripts and SQL queries to fetch and organize satisfaction results users submitted from the mobile app that I developed
- Upgraded company's existing web development platform to today's standards, like by utilizing Webpack, NPM, and Gulp
- Built a simple back-end dashboard for Managers and CEO to view satisfaction results
- Developed an Employee Satisfaction mobile application used internally in more than 9000+ 7-Eleven convenience stores

PROJECTS
